

IBHS FORTIFIED Home™ High Wind / High Wind and Hail Lunch and Learn for Building Code Officials and Inspectors*

**This course has been submitted International Code Council for continuing education credit and approval is pending.*

Wednesday, August 16, 2017
11:30 a.m. to 1:30 p.m.
City Hall – City of Del City
3701 S.E. 15th Street Del City, OK 73115

SPONSORS

The City of Del City
The Disaster Resilience Network
Insurance Institute for Business and Home Safety (IBHS)
Smart Home America

LUNCH PROVIDED BY:

The Brannin Family Foundation & The Tulsa Community Foundation.

Created by the Insurance Institute for Business & Home Safety (IBHS), the FORTIFIED construction method strengthens homes against the devastating power of severe storms, damaging winds, and large hail. Recently passed state legislation will allow homeowners who voluntarily "Designate" that their home meets the FORTIFIED standard to qualify for substantial insurance discounts.

These insurance incentives, as well as the active in-state promotion of the program, means it is likely building inspectors will come across FORTIFIED homes in their communities. This Lunch and Learn will:

- Provide essential information about the resilient construction method and the related scientific research and testing behind the FORTIFIED program
- Follow the process of how an independent, third party FORTIFIED Evaluator inspects a property during the building, re-roofing, or retrofitting of a home
- Examine how IBHS engineers review and designate properties at the three available levels - bronze, silver or gold
- Compare FORTIFIED standards to existing building codes enforced in Oklahoma, and
- Show how existing academic studies support FORTIFIED's effect on increased home values in other markets and how it can do the same in Oklahoma.

PRESENTERS

Mark Zehnal

Senior Roofing Specialist
FORTIFIED Program Manager-Great Plains
